

Communication Health Assistants

Assisting S-LPs and audiologists in all areas of communication.

Speech, Language & Communication Therapy

- Deliver therapy for speech, language, fluency, voice, and motor speech disorders
- Lead communication groups (e.g., for adults with aphasia)
- Prepare materials for assessments in schools, clinics, and hospitals
- Develop programs and resources for classroom and home use
- Support auditory-verbal therapy (AVT)

Assist with AAC

- Program AAC (augmentative and alternative communication) devices
- Create communication boards, visuals, and other AAC tools
- Support AAC use in school, home, and clinical settings

Provide Hearing Services

- Conduct infant and school hearing screenings
- Clean and repair hearing aids and assistive devices
- Educate students, staff, and families on communication and auditory access

Support Swallowing Care

- Assist with instrumental swallowing assessments
- Prepare materials for evaluations
- Help carry out swallowing therapy exercises

Contribute to Research & Advocacy

- Support research on hearing, communication, and swallowing disorders
- Advise on communication access and service eligibility
